## Ulcinj

Ulcinj is located on the southernmost part of the Adriatic Sea coast. The area of Ulcinj is characterized by the Adriatic variant of the Mediterranean climate and subtropicals vegetation. Ulcinj has a highly favorable climate that can rival the most renowned Mediterranean tourist centers. Thanks to its climatic features, Ulcinj is an exquisite summer and winter resort alike.

The town is believed to have been founded in the 5th century BC by colonists from Colchis. The Colchian colonization is mentioned in the 3rd century BC, in a poem by Apollonius of Rhodes. Illyrians lived in the region at the time, and under Greek influence built immense so-called Cyclopean Walls. In 163 BC, the Romans captured Colchinium from the Illyrian tribe of Olciniates and renamed the town Olcinium (aka Ulcinium) after the tribe. Before the medieval period, Ulcinj was known as one of the pirate capitals of the Adriatic Sea. In medieval time, it happened shipwreck ship of Saracen near the shores of Ulcinj with stranded African slaves. Locals rescued the surviving Africans and made them an integral part of the population of the town. In 1571, the Ottoman Turks conquered Dulcigno from the Venetians. Ulcinj finally gained its independence from the Turks on 11 January 1878 by the decision of the Berlin Congress, only to be fully integrated into Montenegro less than three years later, on 30 November 1880.

In the summer time, Ulcinj is a popular tourist destination. Although still undiscovered by many travelers from larger countries, repeat tourists and an increasing amount of first time visitors make Ulcinj a hot spot for vacationers between the months of May and September. Majestic sandy beaches represent a distinctive trait of Ulcinj and a symbol of its uniqueness. The Velika plaza (Great Beach), with a length of 13 km and a width of 50 m on average, is the largest beach; it stretches in the northwest-southeast direction making a mild curve from Port Milena Cove to the mouth of the Bojana.

## Ada Bojana

Ada Bojana is an artificially created river island. In the 19th century, at his location two smaller islands where located between which a ship called Merito was sunk. Though the years, the wreck of this ship and the two islands nearby, gathered river sediment and created this beautiful island. Ada Bojana has a triangular shape. It is touched from one side by the Adriatic Sea and the other sides by the river Bojana. The beach facing the sea is sandy, 3km long and is a heaven for sailing. On the river banks of Ada Bojana there are many fish restaurants that catch the fish in the old time-honored methods.

Only 15 kilometers south from Ulcinj is a 13 kilometers long sandy beach which stretches till the mouth of the river Bojana, from where it continues 2.7 kilometers on Ada Bojana till the Montenegro-Albanian border. Ada Bojana is popular among foreign tourists from Western Europe for its peace and unique atmosphere. This beach exclusively reserved for nudists - also the biggest nudist colony in Montenegro.

The right fork of Bojana is bridged, connecting Ada with Great Beach (Velika Plaza). On the banks of this part of the river Bojana were built wooden huts with strange fishing devices called Kalimera, which make it look like an exotic area of the Far East, Ada far away from the world, are a real oasis of peace and relaxation. Its absolute silence is distributed only by the chipping of rare birds and the breaking of waves. Its thick and lush vegetation makes it a special micro ecological world, the home of rare plants and rare animals. The most beautiful restaurants are on the banks of the river.

Isolated from the real world, the Ada represents a true oasis offering peace and relaxation, ready to bring joy and happiness to the lovers of freedom, nudity and blissful communion with nature.
